MR-S10 RAILWAY SYSTEMS

OPENMR-S10 INTEGRATED RAILWAY MAP QA CERTIFICATE V1.0

INTERNAL QA RECORD • 2026-11-03T01:23:15+08:00

GO — PROTECTED PREVIEW OWNER UAT **OWNER UAT: PENDING**

Product / owner: OpenMR-S10Map / MR-S10 Railway Systems

Scope / build: Malaysia • Singapore • Thailand / 1.0.0-rc1

Branch: candidate/openmrs10-my-sg-th-20261103

Deployed SHA: fc1600b35521457eb9ee90ad79070f4dff7726dd

QA revision: 3fde70401c276109ab1e63b570a2bae631c368b0

Deployment: dpl_GrsFbdbghy4g3VLLpqCqE3YANrwy

Official protected URL: https://openmr-s10map.vercel.app/

Coverage and verified scope

Country	Routes	Listed / source points
Malaysia	21	395 / 371
Singapore	17	288 / 288
Thailand	6	59 / 17
TOTAL	44	742 / 676

Counts are route–station associations, not unique physical stations. ECRL is a default-on reference overlay; China source records remain a separate phase.

QA results

155 source/regression assertions PASS. Final CI: 11/11 jobs SUCCESS. Route-level checks: 44 × 6 desktop/portrait cases and 7 × 4 landscape cases. Final affected-route/global checks: 7 × 10 browser cases. Official protected hosted functional checks: 4/4 PASS. Hosted deliberate-rotation/reset checks: 2/2 PASS.

GPS — simulation verified, physical UAT pending

Blue location marker, received accuracy circle, low accuracy, error callback states and style/filter/fullscreen persistence were tested with simulated coordinates. Foreground opt-in only; no location storage, background watch or calibration write. Physical iPhone/iPad GPS and real Safari permission prompts are NOT VERIFIED.

Geometry and cross-border limits

154 OSM-source segments, zero official/survey-verified segments. Only RTS, Sentosa and Changi APM have directly assigned partial OSM geometry. 55 OSM segments have no service association; 13 optional approximate segments are not verified physical tracks. Most alignments remain DATA GAP. RTS remains under construction in the pinned source. Transfer, service adjacency, physical connection, planned works and proposals are distinct; no regular through-train is implied.

Security and preservation

HTTPS and exact served runtime SHA/assets verified. Vercel Authentication retained; unauthenticated entry returns 302. Temporary test grant revoked. Canonical Auth R2.6 preserved; RLS/role behavior was not newly certified by these public-map checks. No Production, P02/P03, private Owner coordinate or paid-service changes.

Performance observations

CI RAF callback p95 16.8 ms, max 516.6 ms; a long gap was observed. DOM stayed [597, 597, 597]; heap [20.85, 24.34, 24.75] MB over 72 transitions. These are short-run observations, not rendered-FPS, freeze-free or long-duration leak certification. WebKit heap was unavailable.

Evidence and remaining acceptance

Release report, route matrix, exact asset hashes, browser JSON and screenshots are stored beside this certificate in docs/openmr/. Final CI: https://github.com/khairuladamm1993-web/khairul-adam-ecrlrailway-malaysia-portfolio/actions/runs/41488431805. Owner physical Safari acceptance remains PENDING. Managed WebKit native screenshot capture was unavailable; functional checks passed, CI captures passed and hosted Chromium images are supplied.
